EDUCATION

Hilcoe School of Computer Science

Bachelor of Arts in Computer Science

Addis Ababa, Ethiopia

Sep 2015 – Oct 2019

EXPERIENCE

Full-Stack Developer

Maraki Soft PLC

Aug 2021 – Present

Addis Ababa, Ethiopia

- Created SQL queries to fetch data from multiple tables, using complex joins to combine relevant information for the ERP system effectively.
- Worked closely with clients and companies to design, develop, and maintain a comprehensive ERP system encompassing modules such as HR, Inventory, Purchase and Sales, and Manufacturing.
- Took ownership of developing a messaging API for the ERP system, enabling real-time communication for key events like paycheck delivery, task completion in HR, and shipment arrivals at warehouses.

Mid-Level Front End Developer

Jun 2020 - Jul 2021

- Achieved a 30% reduction in web application page load times by implementing efficient code organization, lazy loading, and asynchronous data fetching techniques to optimize performance.
- Implemented a checkout UI design for a laundry company web app, enhancing the user experience and streamlining the order process.
- Optimized web application performance, reducing page load times by 30% through efficient code organization, lazy loading, and implementing asynchronous data fetching techniques.

Junior Front End Developer

Oct 2019 - May 2020

- Contributed as a team member in an agile software development environment to build an Enterprise Resource Planning (ERP) System
- Actively participated in team discussions, contributing creative ideas and solutions to improve project outcomes.
- Showed adaptability in working on diverse projects, embracing new technologies and tools as needed.
- Helped identify and fix front-end issues to ensure top-notch, bug-free software.
- Stayed updated on the latest web development trends and technologies, continuously learning and improving skills to work more efficiently and meet industry standards.
- Demonstrated 100% on-time task completion, consistently meeting project deadlines and ensuring timely delivery.

PROJECTS

Maraki ERP | *Angular, C#, PostgreSQL*

June 2019 – Present

- Developed and integrated a sales lead system to empower the sales team, enabling them to track and manage leads effectively. This system facilitated organized communication and follow-ups with potential clients, ultimately contributing to increased sales opportunities.
- Implemented a real-time notification system to keep users informed about critical updates, tasks, and deadlines, promoting timely decision-making and responsiveness.
- Implemented a robust time logging feature within the ERP system, enabling users to efficiently log employee work hours, enhancing workforce management and payroll processes.

Messaging API | *NestJs, SQL, Git*

May 2021 – May 2022

- Developed a messaging API project, enabling seamless communication through email, Telegram, and Slack channels within the Marki ERP ecosystem.
- Designed and implemented Telegram and Slack bots, integrating them with the messaging API to facilitate efficient and automated communication between the ERP system and users on these platforms.
- Integrated delivery status tracking for messages, providing insights into the status of sent messages and ensuring successful communication with recipients

TECHNICAL SKILLS

Languages: C#, Python, SQL, JavaScript, HTML/CSS

Frameworks: Angular, Node.js, NestJs, Material-UI, Next.js, .NET Core

Developer Tools: Git, Docker, VS Code, Visual Studio, IntelliJ, Figma

Libraries: React, Bootstrap, Lodash
